

- Why did you choose the MINTernship program at KIT?

The MINTernship program was such a great opportunity for me to expand my learning into the energy field, develop research skills, and a great opportunity to travel overseas! Through this program, I got to travel with others from my University, and create friendships both with them and German students. This program is well organized by KIT so I didn't have to worry about where I would live, and I got to go on coordinated trips near Karlsruhe (such as Heidelberg and the Black Forest).

- Why should other international students complete a research stay at KIT?

KIT is the perfect place to learn and grow. I learned so much about technology/energy, but I also learned so much about German culture! The staff and mentors I spoke to are some of the most knowledgeable people on the planet, so you will be in a mentally-stimulating environment. Everyone is extremely friendly, kind, and willing to share their culture with you. Karlsruhe is full of students and fun things to do, and is also in such a great location for traveling to other cities and countries on the weekend!
